Maple Workshop Quiz From Notes

Use this key to check answers and read the explanations.

1. The Maple Workshop issues blue cards for bookings and orange cards for changes. A guest wants to book an activity for the first time. Which card should they use?

A. Orange
B. Blue
C. Either color
D. Neither color

Correct answer: B. Blue

The notes assign blue to booking and orange to change requests. The answer is explicitly stated; it does not depend on real-world color conventions.

2. The Maple Workshop requires people requesting changes to name both the original and replacement activities. A guest writes, 'Please move me from Paper Folding.' Which required detail is missing?

A. The original activity
B. The card color
C. The replacement activity
D. The opening time

Correct answer: C. The replacement activity

The original activity is already named. The rule also requires the replacement activity. The host should not invent a missing choice on the guest's behalf.

3. At the Maple Workshop, every table seats four guests. If all seats are available, how many tables are needed to seat twelve guests?

A. Two
B. Three
C. Four
D. Six

Correct answer: B. Three

12 ÷ 4 = 3. A question about the actual number of tables in the building would be unanswerable because the notes never state it.

4. The first Maple Workshop activity starts at 10:00 and lasts 12 minutes. There is a three-minute changeover before the next activity. When can the second activity start?

A. 10:03
B. 10:12
C. 10:15
D. 10:24

Correct answer: C. 10:15
10:00 + 12 minutes + 3 minutes = 10:15. The distractor 10:12 omits the changeover, making it useful to discuss after revealing the answer.

5. The Maple Workshop allows up to two active bookings. A guest already has two and asks to add a third without changing either one. Which response follows the rule?

A. Add the third because it is only a request
B. Add it if the card is orange
C. Add it because there are four seats per table
D. Explain that the two-activity limit prevents adding it

Correct answer: D. Explain that the two-activity limit prevents adding it
The requested addition would exceed the limit. Card color and seating do not override the rule. If your real process permits a swap, state that separately in your own notes.
